

**Make Table Query: qry999\_FMC\_Perm**

Field:	Co_Name	COMMON_NAME	PC_CODE	EPAREgNo	Prod_Name	Appr		
Sort:				Ascending				
Show:	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Criteria:	Like "fmc"	Like "permethrin"						
or:								

Whatever the NPIRS Oracle database files look like, they ought to be constructing a Query, more or less like this, after you ask the question:

Registrant is FMC  
Active Ingredient is Permethrin

Database: AUG08

I did a Run for my Query, doing Make Table of Results.

Table: tblZZZ\_FMC\_PermethrinRegs

Co Name	COMMON NAME	PC_CODE	EPARegNo	Prod_Name	Appr
FMC CORP. AGRICULTURAL PRODU	Permethrin	109701	279-3013	FMC POUNCE TECHNICAL INSECTICIDE	19790507

*					

Results from EPA's file of current registrations. NPIRS does, and I could, now put results into a Report Template, then present them on screen.

See the Appr (Approval) date. Looks odd? ISO (world-wide, International Standards Organization) format, post Y2000.

YYYYMMDD. NPIRS said they'd post dates in this format. Have not done yet, even though EPA posts in ISO compliant format for Web-posted PPIS files.
