

## D. O'Shaughnessy Consulting, Inc.

### *Quality consultation in toxicology and regulatory affairs*

D. O'Shaughnessy Consulting, Inc. ("DOC") provides scientific and regulatory consulting services for the Crop Protection, Pharmaceutical, Chemical, and related industries, including:

- ✓ Toxicology: Study design, placement, monitoring, reporting, and review, specializing in non-routine studies such as developmental neurotoxicity or immunotoxicity
- ✓ Toxicologic neuropathology: External resource for slide reading, peer review, re-reads, guidance on specialized methods for neurotoxicity studies
- ✓ Worker exposure and risk assessment: Study design, placement, monitoring, reporting and review of field passive or biomonitoring studies, and risk assessment in relation to toxicology endpoints
- ✓ Litigation support: Critical review of claims statements, supporting documentation, proprietary and published studies, critique of testimony, and expert witnessing in toxic tort and similar cases
- ✓ Crop Protection Product regulatory affairs: Start-to-finish planning, submission, and tracking of new or generic registration applications, or specialized problem solving for existing products, with experience in USA, Canada, and Australia. Experienced in data compensation negotiation.
- ✓ Labeling development: Our Press Preliminaries™ Division (*phone 973-726-4532, email jcanucks@nac.net*) provides a comprehensive service in development of regulation-compliant text, including French translation for Canada; interaction between product manufacturer and print-shop, with English or French proofreading for typographic and regulatory correctness
